Revolutionizing Outdoor Rugs with Superior Quality and Eco-Friendly Design

EXTOR CARPETS is a dynamic, forward-thinking company established by Rudolf Mennes, a third-generation Belgian carpet producer. With years of experience in the sales department, Rudolf observed a growing demand for outdoor rugs. He identified a gap in the market: affordable options often compromised on quality, while premium products came with a hefty price tag. Driven by a vision to create the most durable outdoor rugs at a fair price, Rudolf set out to develop a superior product.

Environmental responsibility is a cornerstone of this vision. That's why all Extor carpets are crafted from recycled PET, reflecting a commitment to sustainability. Combined with local production in Belgium, this makes Extor Carpets truly unique in its segment.

Today, Extor Carpets operates globally, offering outdoor rugs up to 4 meters wide in any shape or dimension, meeting the diverse needs of customers worldwide.

THE ROYAL COLLECTION

This collection features four distinct lines: Victoria, Maxima, Mathilda, and Elizabeth. Each line is crafted with the highest quality materials, reflecting the durability and elegance that Extor Carpets is known for. Our outdoor carpets are designed to stand the test of time, offering both exceptional resilience and aesthetic appeal. With a perfect blend of traditional craftsmanship and modern design, these carpets enhance any outdoor space, ensuring long-lasting performance and style.
